Trade Mark Registered

## CATALOGUE NO. 10

*Offices and Display Rooms*

Kansas City, Mo., Los Angeles, Cal., San Antonio, Texas  
New York City, Detroit, Mich., Chicago, Ill.

## ... Foreword ...

MUCH OF THE CREDIT for the continued success and growth of the Friderichsen Tile Company during our many years of operation is due Architects, Builders and Tile Contractors, and if our efforts in producing this catalog will in some small measure repay these men for their enduring loyalty by making it easier for them to plan tile work and order their tiles, we will feel that we have been well rewarded. The manufacture of modern tiles requires unusual skill—a product can be only as good as the men who make it. We take just pride in our organization. The men who are responsible for the designing and production of Friderichsen Tiles are young in years and alert to every modern need and demand—yet they are old in experience and our personnel is made up of a combination of the best American and European craftsmen available in the entire country.

That the character and quality of Friderichsen Tiles themselves are all that modern tiles should and can be is proved by the ever increasing demand and by the loyalty of Tile Contractors who use Friderichsen Tiles for job after job, year after year.

The line of Friderichsen Tiles is complete and includes the leading types in both American and European varieties with a complete line of Ceramic Mosaics, glazed and unglazed. We particularly call your attention to our latest developments in Antique, Spanish Golden Pastels ~~Pheasant~~ made into all the types of patterns and designs with a number of new presentations for floors, wainscoting, fountains, swimming pools, stairs, etc.

Friderichsen Non-Slip Safety Stairs have met with the unqualified approval of both Architects and Builders and we can point to many of these highly decorative installations.

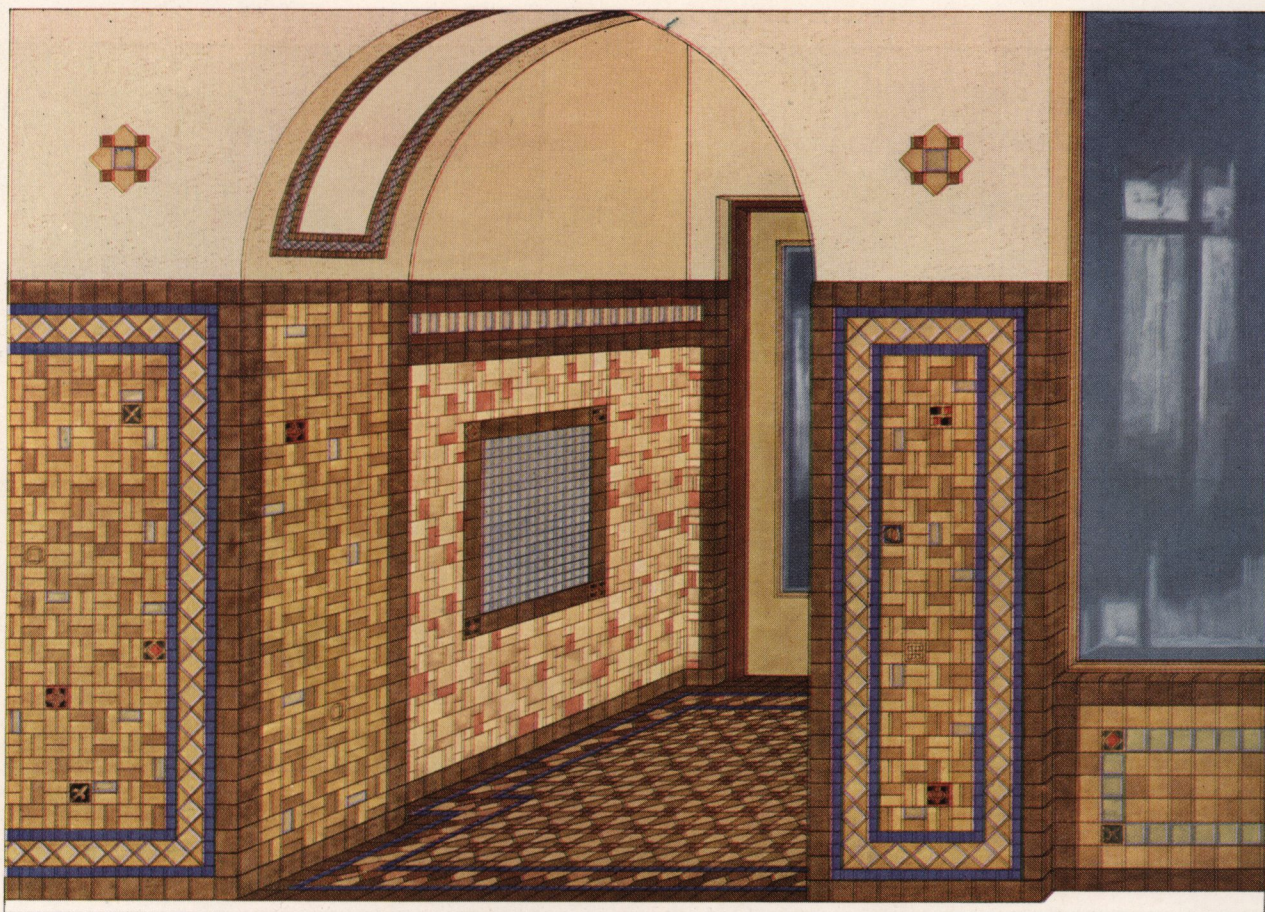

Our Designing Department is at your disposal and we invite you to take advantage of the services this department can render in preparing sketches and designs along with your suggestions or to fit your individual requirements—and your suggestions and criticisms are always welcomed.

We sincerely trust that you will be well pleased with our efforts in producing this catalog and that you will keep it readily available in your files and call upon us from time to time for any suggestions or services that we can render you.
